

Himanshu Wadhwa

Full Stack AI Developer | AI Engineer

+91 9958899757 usernamehimanshu999@gmail.com linkedin.com/himanshu github.com/Himanshuwadhwa1 himanshuwadhwa.com

Summary

AI Developer with hands-on experience building intelligent search systems and document automation solutions for enterprise platforms. Strong in Python and JavaScript, with full-stack experience across React, Node.js, and Fastapi. Delivered production features at Smarter.codes, improving model accuracy, system performance, and workflow efficiency. Solid foundation in software engineering with experience in C++, SQL, and scalable backend development.

Work Experience

Software Engineer (backend)

Mar. 2026 – Present

Intellemo.ai

Gurgaon, Haryana, India

- Developed and maintained scalable backend services in Python, building RESTful APIs and integrating with GraphQL gateways, supporting **6+ internal/external services** and reducing API response latency.
- Integrated Google Ads and Meta Ads APIs to automate campaign creation, execution, and reporting workflows, reducing manual effort by **10 hours/week** and supporting **35+ campaigns/month**.
- Engineered automated workflows for Meta Ads video campaigns, enabling end-to-end campaign deployment and engagement tracking across web platforms, improving campaign launch efficiency by **20%**.
- Architected a scalable broadcasting platform for Email and WhatsApp communications, enabling automated campaign delivery and customer engagement at scale.

Full Stack AI Developer

Feb. 2025 – Mar. 2026

Smarter.codes

Remote, Haryana, India

- Delivered production-ready AI search and document automation features for enterprise platforms (Kray.ai, Synterex).
- Optimized AI search relevance using industry-specific training data, improving result accuracy by **10 %**.
- Built analytics dashboards to track user behavior and search patterns for data-driven product improvements.
- Improved medical writing workflows by refining LLM prompts and orchestration for reliable document generation and reduced manual work by **25 hours/week**.
- Build LLM pipelines using vector embeddings, semantic search, and RAG for dynamic document data insertion.
- Redesigned document generation workflows, reducing draft creation and review time by **40 %**.
- Implemented unit and integration tests to ensure system stability and reduce post-deployment issues.

Projects

LeafLens | *Python, Flask, Hugging Face, JavaScript, MongoDB, TensorFlow*

- Led a team of **5** in developing a plant classification model with **90 %** accuracy, achieving **78 %** test accuracy.
- Integrated the ML model with a Flask-based back-end, ensuring smooth API interaction and front-end integration.

We Groww | *Next.js, TypeScript, Sanity, Sentry, NextAuth*

- Built a platform for users to showcase projects with images, descriptions, and engagement tracking.
- Implemented GitHub OAuth2.0 authentication with NextAuth and validated inputs using Zod.
- Integrated Sanity for content management and Sentry for real-time error monitoring.

Skills

Programming Languages: Python, JavaScript, Java, C/C++, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Next.js, Angular.js, Spring boot, Flask, FastAPI, Tailwind CSS

AI: Agentic AI, RAG, Langchain, MCP, OpenAI, Prompt Optimization, Hugging Face, Multi Agent System

Technical Skills: Data Structures, Algorithms, REST APIs, OAuth2.0, Debugging & Troubleshooting, System Design

Tools: Git, Docker, AWS, VS Code, Postman, Figma, Sentry, Firebase, Claude code, Cursor, Github Copilot

Databases & Content: MySQL, PostgreSQL, MongoDB, Sanity, PrismaORM, Pinecone, CosmoDB, FAISS, ChromaDB

Professional Skills: Client Communication, Requirements Gathering, Analytical Thinking, Agile/Scrum, Adaptability

Education

Vivekananda Institute of Professional Studies

Bachelor of Technology in Artificial Intelligence and Data Science

2021 – 2025

Delhi, India
