

Himanshu Wadhwa

Full Stack AI Developer | AI Engineer

+91 9958899757 | usernamehimanshu999@gmail.com | linkedin.com/in/himanshuwadhwa1 | github.com/Himanshuwadhwa1 | himanshuwadhwa.com

Summary

AI Engineer with production experience building LLM-powered search and document automation systems using Python, and hands-on work extending retrieval-augmented generation with knowledge graphs for relationship-aware question answering. Skilled in vector embeddings, semantic search, and NLP-driven entity extraction, applied to real enterprise workflows – improving search relevance and cutting manual processing time. Comfortable working across the stack needed to ship AI features, from retrieval pipeline design to the backend services that serve them in production.

Skills

Languages: Python, JavaScript, TypeScript, SQL

AI/ML: LLMs, RAG, Chatbot, Knowledge Graphs, NLP, Embeddings, Semantic Search, Prompt Engineering, Deep Learning

Frameworks: FastAPI, Flask, React, TensorFlow, Hugging Face, Langchain

Tools & Databases: Git, Docker, Postman, Pytest, Jest, Weaviate, Qdrant, Neo4j, MongoDB, CosmosDB

APIs & Backend: REST APIs, GraphQL, Third-Party API Integration, Webhooks, Microservices

Work Experience

Software Engineer

Apr 2026 - Present

FreeLance

Remote

- Independently building an ecommerce website for a devotional items business using React and Next.js.
- Completed frontend UI and site structure; backend development and integration in progress.

Software Engineer (backend)

Mar 2026 - Apr 2026

Intellemo.ai

Gurgaon, Haryana, India

- Built RESTful APIs and GraphQL gateway integrations across **6+** internal/external services.
- Automated Google Ads and Meta Ads campaigns, saving **10 hrs/week** across **35+** campaigns/month.
- Used webhooks and microservices to sync campaign data across ad platforms in real time.
- Architected a scalable broadcasting platform for Email and WhatsApp communications, enabling automated campaign delivery and customer engagement at scale.

Full Stack AI Developer

Feb 2025 - Mar 2026

Smarter.codes

Remote, Haryana, India

- Built AI-powered search and chatbot in Kray.ai, resolving product queries with relevant results.
- Built LLM pipelines with vector embeddings, improving Kray.ai search relevance by **10%**.
- Built analytics dashboard tracking search activity; validated with unit and integration tests.
- Redesigned Agilewriter's document generation pipeline architecture for Synterex, cutting draft/review time by **40%**.
- Refined LLM prompt orchestration for Agilewriter, cutting medical-writing effort by **25 hrs per week**.
- Migrated Agilewriter's similarity search from Redis to CosmosDB; added pytest, Jest, and smoke testing.

Projects

Search Relevancy Engine | *Flask, BeautifulSoup, Weaviate*

- Built a Flask-based tool that scrapes a given website using BeautifulSoup for a user-specified keyword.
- Generated embeddings and stored them in Weaviate to return top 5 rank scraped content by semantic relevance.

LeafLens | *Python, Flask, Hugging Face, JavaScript, MongoDB, TensorFlow*

- Led a team of **5** to build a plant classification model, achieving **90%** train / **78%** test accuracy.
- Integrated the model with a Flask backend, exposing predictions via REST API for frontend use.

ResearchMind | *FastAPI, React, Next.js, Qdrant, Neo4j*

- Building a RAG-based research assistant that retrieves cited answers using Qdrant (vector database) embeddings.
- Extended retrieval with a Neo4j knowledge graph via entity extraction, enabling Graph RAG for relationship queries.

Education

Guru Gobind Singh Indraprastha University

Bachelor of Technology in Artificial Intelligence and Data Science

2021 – 2025

Delhi, India
